SUMMARY

My aim is to continually advance my development skills while remaining current with the latest web technologies and design trends. I'm deeply passionate about crafting user-friendly and responsive web interfaces that elevate user engagement and contentment. I'm eager to apply my proficiency to cutting-edge projects and collaborate with diverse teams to deliver exceptional web solutions.

WORK EXPERIENCE

Technical Content Engineer and Mentor
CollegeDekho Pvt. Ltd. l Gurugram   2022 - Present

- Instructed over 600+ undergraduate, graduate, and working professionals in the realm of MERN stack development.
- Conducted routine code assessments and quality assurance evaluations to pinpoint and resolve issues, maintaining a consistently high standard of code quality and system performance.
- Devised and strategized the framework for course content, meticulously planning the architecture of lectures encompassing the full-stack development curriculum. Ensured comprehensive coverage of essential topics, integrating hands-on projects for practical learning.
- Equipped students with interview preparation, offering relevant interview questions, and conducting mock interviews to enhance their readiness.
- Assessed assignments rigorously, delivering detailed feedback to students, overseeing the development of significant projects, and creating comprehensive notes for each stack.

PERSONAL PROJECTS

E-Commerce

- An E-commerce website, specially designed for people who love to shop sitting at home with just one click.
- In Which User and Admin both can access the website.
- This project is built by using ReactJS, Redux, CSS3, NodeJS, Express, and MongoDB as a database.

React Blogging site

- I've created a blogging website featuring trending topics from a variety of domains, including Bollywood, Hollywood, the latest advancements in technology, and mouthwatering food recipes.
- This project was developed using React, incorporating the Context API, and styled using CSS with styled-components..

Food Recipe app

- I've designed a website that an extensive collection of recipes, complete with step-by-step instructions for each dish. These recipes have been sourced and integrated into the platform via an external API. Users can search for specific items and even save their favourite recipes for future reference.

Weather App using Weather API

- I've created a straightforward application for retrieving weather information for any global location. This app utilizes a weather API to fetch the necessary data.
